BACK GROUND

Wealth Zone is found in late 2008, with the vision of providing Embedded System Solutions. In the last two years of operation Wealth Zone built niche ability in Mobility and Security domains. As apparent from recent trends, these form the backbone of many Technology driven Solutions in various sectors like BFSI, Education, Energy/Power, IT, Logistics, Manufacturing, Power and Retail.

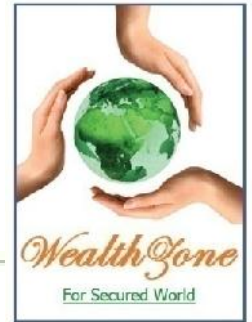

HISTORY

We are a technology firm based in Hyderabad, India. Founded & Lead by seasoned and passionate Technology Experts, Wealth Zone is a specialist in S/W Systems, Security & Automation Solutions with Integration as the key strength. Founded in late 2008, Wealth Zone has made significant progress in last two years of operation as being established a credible System Integrator in Security Solutions.

Wealth Zone provides One-Stop shop approach by bringing together a host of solutions/services to the Customer. They include: Business Process/Strategy Consulting; Integrated IT Application Development and Maintenance; Security/HW Solutions and Maintenance. Some of our clients include firms from Fortune100.

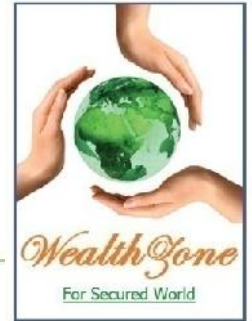

What We Do ?

- Application Development & Maintenance
- Web Development & Maintenance
- Graphic Design
- Web Hosting
- E-Mobility Solutions
- Web Designing & Solutions
- Search Engine Optimization
- Security Systems
- Automation Solutions

What We Do ?

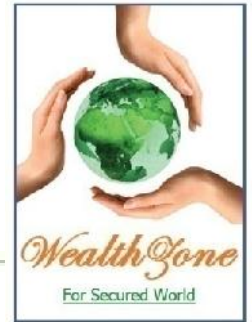

Application Development & Maintenance

- Application Development
- Application Maintenance
- Application Re-engineering
- Product Development and Enhancement
- Applications on Schools Software

Web Development & Maintenance

- Corporate Website
- Portals & Its Maintenance
- E- Commerce Solutions
- Web Management & Maintenance
- Content Management Systems

What We Do ?

Graphic Design

- Logo Design
- Brochures Design
- Website Templates

Web Hosting

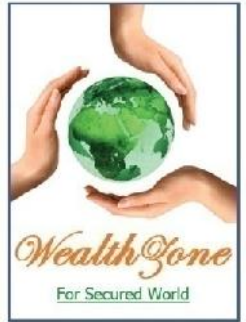

- Dedicated Hosting
- Resellers Hosting

E-Mobility Solutions

- Bulk-SMS
- Bulk-Voice Calls
- Email Marketing
- Short Code
- Long Code

What We Do ?

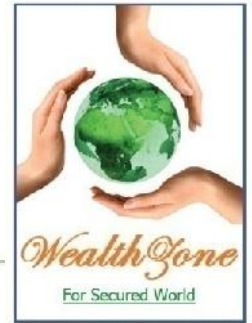

Web Designing & Solutions

- Creative Designing
- Web-site Designing
- Innovated Templates
- Videos Streaming
- Website Re-Engineering
- Web-site Renewals
- Web Animation

Search engine Optimization

- On Page Optimization
- Off Page Optimization

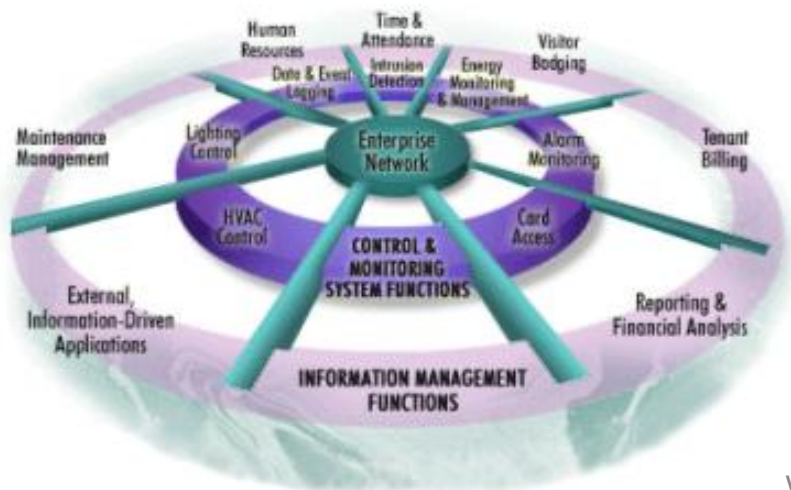

What We Do ?

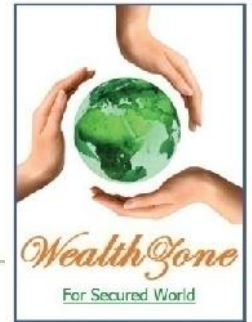

Security Systems

- CCTVs

Why We Do ?

Vision

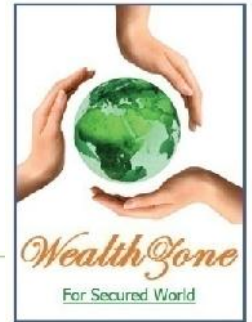

“To build a service industry which remains interfaced with changing global scenario, engaged in research and analysis and relevant inputs to deliver its expert services to commercial enterprises”. We also have excellent relations with India’s top Engineering colleges (BITS, IIT, etc.), by virtue of being the “Education Technology Partner” of AMD to bridge the gap between Academia and Industry. Apart from active operations people, we do have veteran specialists as advisors coming from Defence, Internal Security, Metallurgy, Pharma, Energy, Steel and Marine sectors.

Mission

“We Shall offer a strong service support environment to our customers to any part the globe which will encompass Analysis, Design, Technology, Service Support to provide user friendly and functional automation”. Our associations in Physical security domain include channel relations with Cisco, Axis, Verint, Dvtel, Acti and Sightlogix. While in IT security domain, we are partnering with Astaro (a leading German OEM in this segment) for UTMs (Unified Threat Management) apart from CISCO. Wealth Zone is active in the segments of Steel/Power/Pharma Plants and Sea Ports. Currently we are engaging with some of the major customers in these domains including Vizag Steel Plant and Visakhapatnam Port Trust which are among the biggest in the country.

Where We Stand ?

With The Expertise of Domains :

- Web Design and Development
- Custom Web Application Development
- Search Engine Optimization
- Application Development
- Internet Marketing
- Web Hosting
- Security Systems
- Building Management System
- Audio Video Door Phone System
- Intercom Solutions
- Home Automation
- Fire Alarms and Fire Fighting System
- R O System

Why we are different?

Wealth Zone is a member of

- [ITSMEIndia \(India's First IT Consortium\)](#)
- [APSA \(Asian Professional Security Association\)](#)
- [TiE \(The Indus Entrepreneurs\)](#)

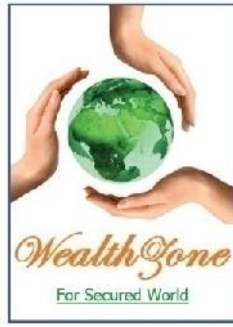

Registered with Indian Government as a SME Firm

Core competencies

- **Security Solutions:**
- Data security is at a continuous threat not only in its popular Email and File Transfer form, but also for Unified Communications using Speech, Audio, Video and Graphics. Rich content driven communication is the norm of the day.
- In this context Wealth Zone has developed significant IP to integrate most advanced encryption and security modules into the Mobile Smart phones.
 - We cover all major platforms with these solutions bringing previously unheard of technologies (like smartcard based 2-factor authentication, PKI, Multi OS solutions) into Mobile ecosystem, partnering with World renowned encryption and smartcard makers.
- While Mobility is a new challenge for Security, traditional Computing Network and IT systems are facing renewed threats and higher level of risk of compromising.
 - Wealth Zone has partnered with again some of the most innovative and technically advanced players to implement the enterprise level, full Unified Threat Management protection.
- In terms of Security, Big and Small Enterprises face major risks and threats from ever increasing level of hacking.
 - Hence Wealth Zone offers platforms serving different sizes of Enterprises including the complete feature set and the same ease-of-use.

Core competencies

- **Mobility Solutions:**
- **More and more Enterprise Software Products and Systems are being upgraded for Mobility. Wealth Zone has matured its skills into offering a complete solution unlike Application coding only approach taken by most players.**
- **Adding Mobility to existing Applications/Business is a productive aspect, only when it is conceived in a proper manner considering disparate OS, Frameworks, Handsets, Browsers and Networks.**
 - **This calls for a knowhow which is across the disciplines of the above and Wealth Zone has nurtured this starting with the Founders who worked all the way up the food chain from Chips to Systems.**
- **The User Experience (UX) is a key enabler for Mobility and it is a more of a Necessity than being a Luxury.**
 - **Wealth Zone offers creative and true design oriented approach to UX amalgamating Information architecture, User interaction design, User Interface & Visual Design, and UI Development.**
- **The User Experience (UX) is a key enabler for Mobility and it is a more of a Necessity than being a Luxury.**
 - **Wealth Zone offers creative and true design oriented approach to UX amalgamating Information architecture, User interaction design, User Interface & Visual Design, and UI Development.**
- **Enterprise grade Solutions need to work with multiple Handsets used in the firm needing Multi Platform Support to cover a wide variety.**
 - **Wealth Zone's team has expertise in designing/testing for iPhone, Android, RIM, Symbian, Windows Mobile and J2ME enabled Devices.**

Our Industrial Security Experience

Wealth Zone Technologies is a leading security solutions provider for INDIA's top rated organizations. Our products/Services for Industries are,

Products

- Security Surveillance Cameras
- Home/Office Automation Systems
- Fire/smoke/gas Leak Detectors
- Multi-apartment Video Door Phones
- Attendance & Access Control Systems
- Perimeter Surveillance Systems
- Guard Monitoring Systems
- Metal Detectors (DFMDs & HHMDs)
- Boom Barriers
- Vehicle Tracking System
- Asset Tracking System
- Automatic Gates (Turn-stile, Slide etc..)
- Fire & Intruder safety products
- Public Addressing System
- Other Industrial Process Products
- Products for Business process and parameter
- controls like temperature, pressure etc... Custom built for specific needs
- Cement Bag Counting System

Our Industrial Security Experience

Wealth Zone Technologies is a leading security solutions provider for INDIA's top rated organizations. Our products/Services for Industries are,

Services

- Site Survey & Security Project Planning
- Wireless network design, implementation;
- integrating products with existing network
- OFC Cabling – Laying, Splicing, integrating with network
- Installing new security product network and/or
- Integrating products with existing network
- Annual Maintenance Contracts (AMC) for
- existing systems

Our Recent Projects

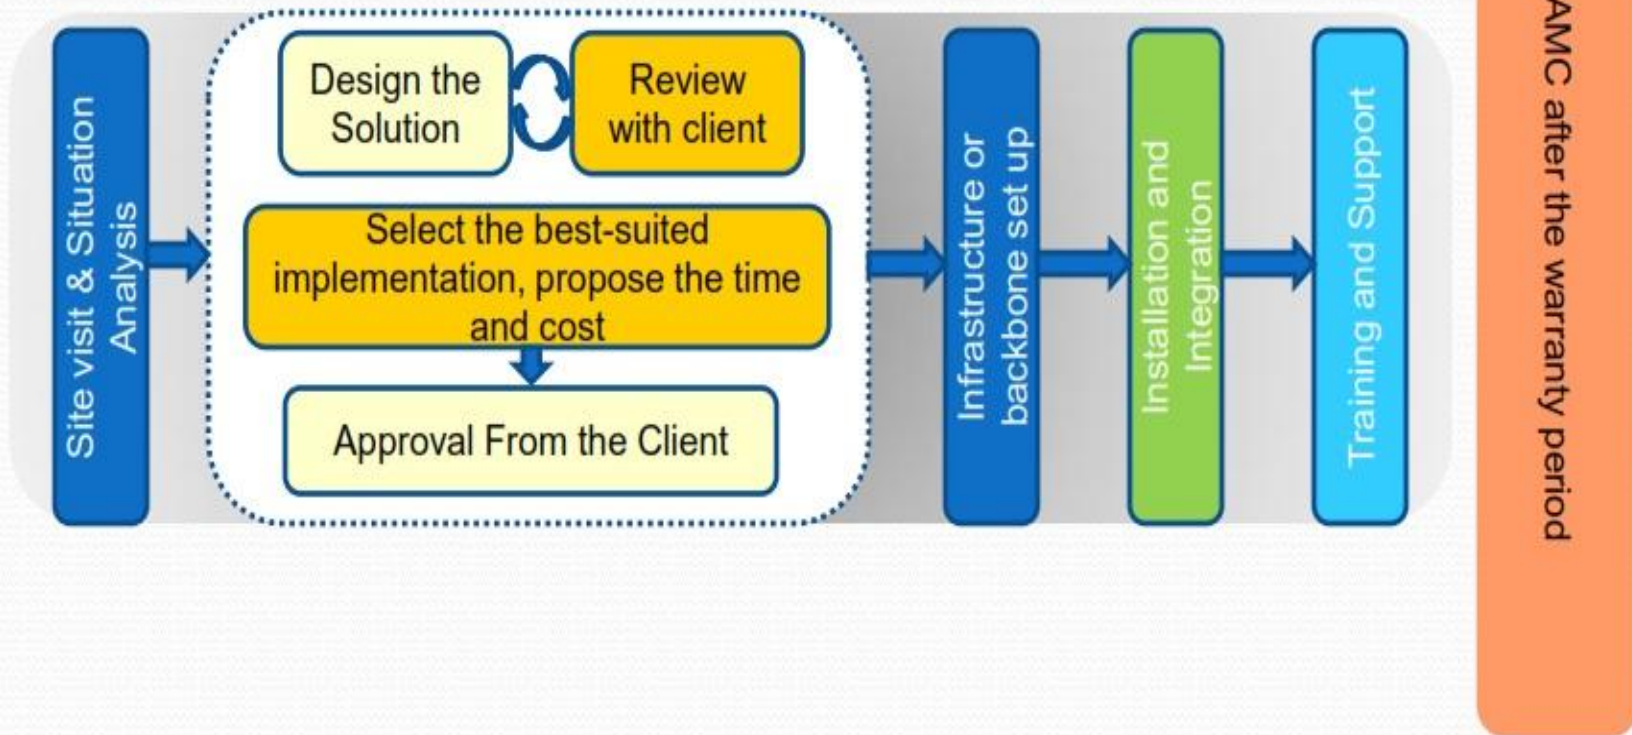

- ✓ Security Surveillance Cameras for GMR Highways at Pochanapally, Jadcherla, Ullundurpet.
- ✓ Toll plaza CCTV Cameras and security systems on NH5 at Pottipadu, Kalaparru, Toopran, Aganampudi
- ✓ Toll ticketing software integrated with CCTV and security systems for training at Raxa Academy for GMR group.
- ✓ Plant surveillance and Security systems for the 3600 MW KSK Mahanadi power plant at Chattisgarh – a green field project (on going)
- ✓ RFID-based Vehicle tracking system at UltraTech Cements, Tadipatri, Anantapur(dist)
- ✓ CCTV and Guard Patrolling systems at GMR VPGL Power plant, Rajahmundry – Awarded as India's 2nd best operational power plant
- ✓ CCTV, biometric and Guard Patrolling systems at GMR Care Hospital, Raajam, Srikakulam(dist)
- ✓ CCTV System at Penna Cements Ltd, Tadipatri, Ananthapur(dist)
- ✓ Wireless CCTV System at Kalyani Gerdaul Steels Ltd
- ✓ Lakshmi Vilas Bank, Pan India; Co-operative Town Bank, Tadipatri
- ✓ CCTV, Fire and PA Systems for Kalamandir Stores in South India
- ✓ Hospitals, Nursing homes, Retail outlets and Educational Institutions, All over India,
- ✓ CCTV, Fire, Intrusion Systems at Land Mark Group stores in South India

OUR WORK PROCESS

Enterprise Electronic Security Surveillance and Automation

Wealth Zone Technologies

For Green World-For Secured World

www.wealthzonetech.com || Info@wealthzonetech.com

www.wealthzonetech.com

Case Study 1 – CCTV System at VPGL

Vemagiri Power Generation Limited (VPGL) is a thermal power plant of GMR group. It is located in Rajahmundry, Andhra Pradesh. Very recently, it was awarded the second best power plant in India for Operations management.

Wealth Zone Technologies proud to be associated with such mega project and be able to contribute when the plant's operational and security processes were being optimized.

Scope of project included installing new security network in an upcoming plant and some parts of operational plant; integrating existing network with state-of-the-art security products – PTZ IP speed dome cameras (make: Bosch), Guard monitoring system, Laying of OFC cable and integrating to network for IP Configuration

Challenges were different since most of the plant was up and running while some portions were new construction. Seeking approvals and working with various other teams (civil, electrical) and still be able to meet stringent deadlines with high-quality standards.

Received very high appreciation and accreditation of work from the top management of the plant. Repeat orders from GMR group to handle their security projects in Kakinada power plant, GMR/CARE hospital besides other projects in pipeline speaks for itself.

Work Progress---GMR VPGL Power Project

Work Progress---GMR VPGL Power Project

Case Study 2 – RFID based Vehicle Management at ULTRATECH Cements

- Wealth Zone Technologies has designed a customized solution for the critical operation at the plant to track movement of dumper vehicles to the crusher units. Dumpers are huge vehicles that carry tons of raw material (like limestone rocks) that are dumped into a crusher unit. The crusher unit breaks the material to required size and sends it to the plant on a conveyor belt for cement-making process.
- Scope of project installation and configuration of Long-range RFID Wiegand Readers at the entry and exit points of the crusher unit. Each dumper is fitted with a passive RFID tag so that it is read as soon as it comes near the reader. Passive tags have virtually unlimited life and will have controlled RFID influence.
- Controller connected to LAN reads the data and it is processed thru a software installed on the LAN server. Various reports like cycle times, number of trips of dumpers (and hence payment to drivers), shift handling have been streamlined due to the system.
- Challenges were primarily in being able to read the tags at required speed and distance from the reader. Due to mine area, the dusty and hot environment posed a threat to reader and cabling. Armored cabling with IP-65 reader solved the purpose. Tuning of reader was done to be able to optimize reading at required speed of dumper without installing physical barriers to cut speed.
- Received very high appreciation and accreditation of work from the top management. Productivity of th key crusher-dumper operation has improved by 60%. Currently we are also undertaking other security related works for biometric Time & Attendance systems, CCTV, RFID-based boom barriers across the plant.

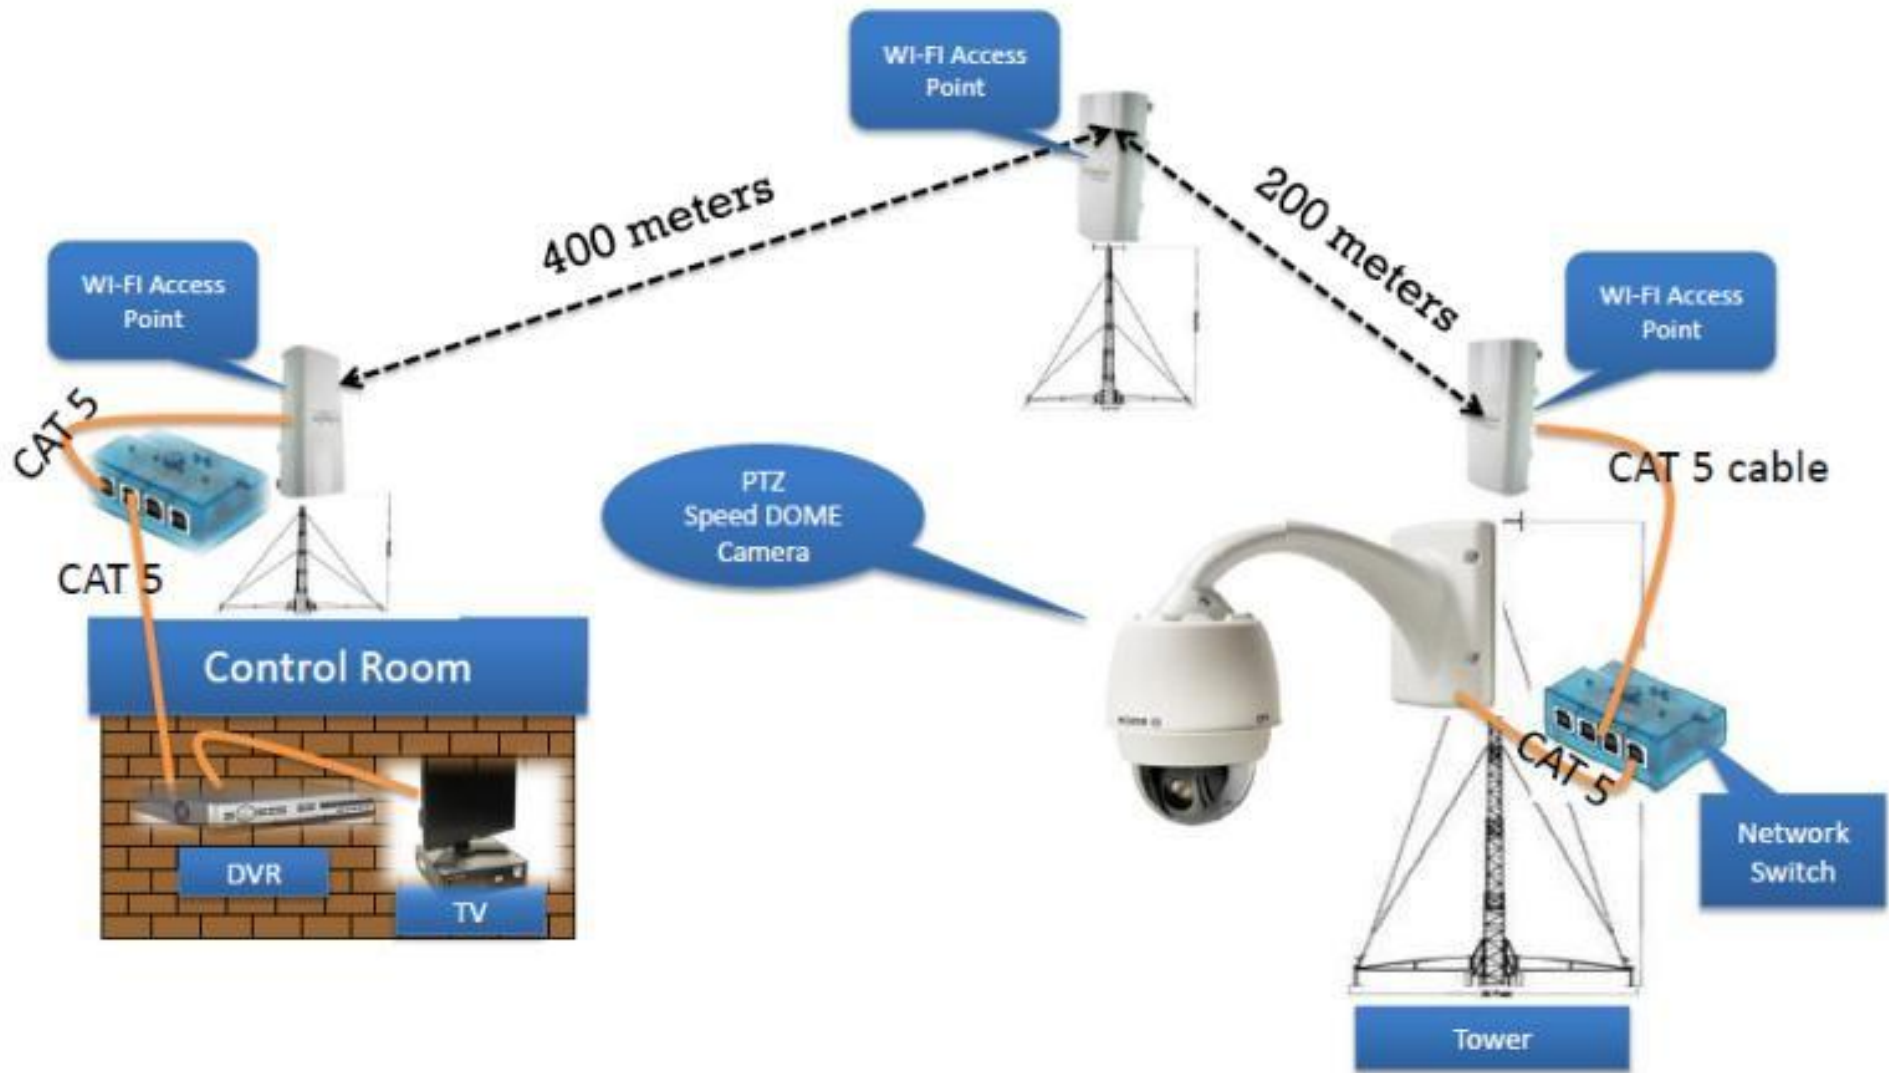

Case Study 3 – Wireless Surveillance at KGSL

- Kalyani Gerdau Steels Ltd needs security monitoring to happen unobtrusively and be kept free of any cables. Wealth Zone Technologies has been employed to design and implement a suitable solution for the plant after due selection process.
- Sintering plant, Rolling mill, part of perimeter security have been covered under the scope of current phase of project.
- Cameras have been identified based on the specific needs of mechanical filtration, heat resistance and dust protection required in the plant. High-resolution cameras from Bosch were used and they were
- enabled for remote viewing 24/7.
- Challenges started right from designing the solution that remained economical and reliable with wireless network deployment. LoS conditions were thoroughly analyzed, right camera configurations have been proposed and procured after 3D simulation studies using software.
- Received very high appreciation and accreditation of work from the top management. Other parts of the plant like Power Plant, Coke Plant, Balancing Facilities in SMS are being added under the purview of electronic surveillance along with plant premises.

Security Products

Security Surveillance Cameras

One of the best and easiest ways to monitor Your property is with the wide range of security surveillance cameras available to meet specific security needs.

Attendance & Access Control Systems

Access Control System allows authorized people into a restricted area via identification through Magnetic/RFID/Smart Cards with contact/ contact Less card Readers, biometric Readers, IRIS Readers.

Perimeter Surveillance Systems

Utilizing Passive Infrared (PIR) sensor technology and telescope-like, precision mirror glass optics, long-range detector provides early warning of intrusions by detecting the slightest temperature change when someone passes through a perimeter security beam into the protected area. Detects intruders crawling, walking, or running at speeds from 0.7 to 17 ft/s.

Security Products Cont.....

Guard Monitoring System

Guard Monitoring system is a cost-effective way of monitoring security guards on site. The idea is to use the latest technology to monitor the guard from a control room continuously to ensure that the guard is awake, alert and doing regular patrols as required.

Video Door Phone

Video Door Phone is a high tech, electronic security product that allows one to see and speak to a visitor before opening a door. It is also equipped with a remote control

Metal Detectors

Metal detectors are used to detect both ferrous and nonferrous metals concealed on a person. These security metal detector are widely used in airports, courtrooms, custom, bank, jeweler units, defense establishments, malls, and other public places.

Security Products Cont.....

Boom Barriers

Boom barriers can easily control access into areas where unauthorized vehicles or persons are not permitted. Other applications include parking garages, commercial buildings, apartments, hospitals and industries, each supplied with individual control systems.

Automatic Gates

Whether it's for a business or residence, an automatic gate is a great feature to keep family and property safe. They allow access to those allowed inside while closing tight to keep others Out.

Vehicle Tracking System

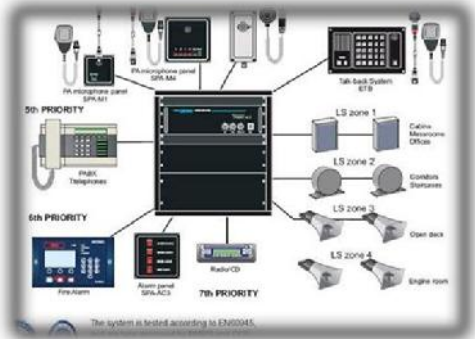

A vehicle tracking system consists of a device placed in a car, truck, boat, RV, ATV or other vehicles which works with tracking Software or a tracking service to locate the vehicle if it's lost or stolen.

Security Products Cont.....

Public Addressing System

It is a centralized amplifier based system that's been designed to provide voice paging and to broadcast alarm tone during emergencies. The system can transmit alarm tone and routine voice messages, from a central location, to all or selected areas of the facility, in a reliable and safe manner, by the use of loudspeakers.

Building Automation System

Building Automation Systems (BAS) optimize the start-up and performance of the heating, Outline ventilating and air conditioning (HVAC) equipment and alarm systems. BAS greatly increases the interaction of mechanical subsystems within a building,improve occupant comfort, lower energy use and allow off-site building Control.

Asset Tracking System

Asset Tracking System is designed to control and manage mobile and fixed assets. This system centrally manages; what assets you have,where they are, who uses them, and all costs associated to the items. ATS has a comprehensive asset tracking solution with extensive bar coding and numerous Radio Frequency Identification (RFID) technologies and functions.

Security Products Cont.....

Dragon Search Lights

LENGTH OF THE BEAM: It is able to sufficiently illuminate a person in camouflaged dress at a distance of 750 meters when seen through a binocular on a clear night.

RUGGEDISED: It is impact and water resistant. It has a suitable padding on the underside of the body to absorb shock and is functional in heavy rains.

DURATION OF OPERATION: HHSL is able to operate continuously for at least 90 min on a fully charged battery. Its glow does not reduce during the period of operation.

Night Vision Binoculars

Night Vision Binoculars providing premium performance and modern design. Binoculars has 42mm lens and 3X magnification that proves to be ideal for security.

Features

42mm NexGen Binoculars Feature
Generation 1 Technology
Central Focusing
Padded Carrying Case
Rubberized Housing
Easy to Use Design
Lightweight at 30.6 oz

Security Products Cont.....

Gas Leak Detector

Gas Leak Detection Systems have been designed with an advanced electronic technology which is user friendly and with no reset or mute options for a fail safe operation at low cost.

The range of gases that can be detected are LPG, CNG, Acetylene and other Hydro Carbons, besides Hydrogen, Ammonia, Carbon Monoxide, Carbon Di Oxide, Solvent Vapors.

Fire Safety Systems

To exceed customer & market expectation & satisfaction, provide a fire safe solution by utilizing the most advanced & time tested technologies at the most competitive prices which are totally value for money.

The nature of our works is Design, Supplying, Installing, Commissioning and Maintaining Turn Key Based Fire

Fighting systems such as,

Wet & Dry Riser Fire Hydrant Systems.

Sprinkler and Spray Systems.

Smoke, Heat & Flame Detection Systems.

Gas Based Fire Suppression Systems. (CO2-FM-200-Halon alternatives)

Dry Powder & FOAM based Flooding Systems.

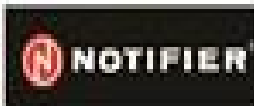

Manual Fire Alarm with Public Addressable (P/A) Systems.

Our Brand Association.....

We are Specialists in all makes of Fire Alarm Systems

& many more ...

Management Team

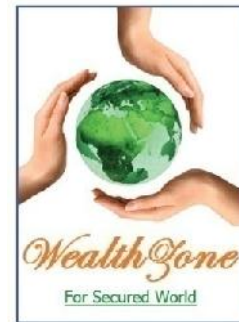

Mr. M. Kishore Kumar
Founder & CEO,

Kishore Kumar has 22 years of managing and business development experience in Information Technology. Prior to joining Wealth Zone, Kishore has worked with AVIVA, ICICI, ACROPETAL, RAMTECH (Canada), Globally United Consultants (GUCONS), Society for Information Technology and Development (SITD), iBall.

Kishore is working as a technical Partner for RAXA Securities (A GMR Group Company) for completion of their projects for the Govt Sectors like Vizag Port Trust (VPT), Vizag Steel Plant (VSP) and for a private sea port like Karaikal Port (A Marg Group Company) for Physical Video Surveillance and Vehicle Tracking Systems projects.

Kishore has earned a Masters degree in Business Administration from Osmania University, and has a total IT experience of about 6 years in Software Testing. His other qualifications include an M.Sc (Mathematics) from M.K.University, A Level Certification from DOEACC, New Delhi.

Service Certificate

- This is to certify that M/S WEALTH ZONE Technologies, Hyderabad has successfully implemented CCTV (Analog & IP), RFID based solutions on behalf of M/S Technotarium Solutions, primary vendor for several projects done by M/S Technotarium Solutions.
- The work scope involved installation, configuration, testing and technical support for BOSCH, Samsung, Sony IP & Analog cameras over a Point-to-Multipoint wireless network of Motorola & Fibre Optics. Video analytics were configured on server using Milestone Xprotect, Bosch, QNAP servers. Also successfully implemented Access control, Asset tracking & Vehicle tracking solutions using HID, Rosslare, ID Cube RFID technologies.
- M/S WEALTH ZONE Technologies contributed their skills & knowledge along with M/S Technotarium Solutions for major industrial leaders like GMR Power, GMR highways, Ultratech Cements, KSK Mahanadi (INDIA's highest productive) power plant, GERDAU (Brazil based) steel industry, Lakshmi Vilas Banks etc.
- It has been a pleasure working with M/S WEALTH ZONE Technologies for their thorough knowledge of the products, professionalism and adherence to time & cost constraints. They have overcome many a challenging situations at the site to successfully complete the project.
- We wish to continue working with them as a valued partner for our future projects. We highly recommend them to any customer with similar requirements.
